1. Introduction

Dhaka Stock Exchange (DSE) has implemented a Centralized Order Management System 'DSE-FlexTP' for the TREC holders of the exchange to manage their orders. The introduction of this technology has bring a new dimension of business opportunities in the capital market, and it is exciting to see the exchange embracing state-of-the-art technology to improve trading efficiency. The Mobile App (DSE-Mobile), is to leverage the DSE-FlexTP architecture to make trading available to investors from mobile device. This is connected investors to the state-of-the-art technology of trading. DSE-Mobile is being facilitate to bring new dimension of business opportunities in the capital market.

DSE-Mobile was introduced in March 2016 and has undergone regular updates to meet user needs and ensure compliance with security standards. The latest version, DSE-Mobile v2, was released in April 2023 with advanced feature and utilizes the latest development frameworks to optimize usability and improve the user experience.   The DSE-Mobile App provides real time Equities bid/ask quotes, Request for Streaming (RFS) trading capabilities, managing and monitoring resting orders in a secure mode, in synchronization with a Web HTML5 app for dealers at office. DSE-Mobile is a native mobile application for iOS and Android phones.

- Tracking of executions;
- Order Blotter Filters;
- Biometric Authentication;
- Self-password reset and device un-register;

⚠ **DSE-FlexTP System** - *Information in this manual is general in nature. We recommend to seek independent financial advice and ensure you fully understand the risks involved before trading.*

2. Getting Started

2.1.   Accessibility of DSE-Mobile

Three different accessibility in DSE-Mobile:

- ■ **DSE-Mobile VIP** – Allows you to be aware of your portfolio and favorites without efforts, keep in touch with professional trader to get high-end services. Trader will professionally manage best execution of your orders.

- ■ **DSE-Mobile Trader** – Allows you to be aware of your portfolio and favorites without efforts, keep in touch with professional trader to get high-end services while availing ability to manage orders yourself.

- ■ **DSE-Mobile Biz Owner** – Allows business owner to be aware of activities of their broking business status. This is only for dealer account (Type D) of TREC holder.

The DSE-Investor is another platform allows trading available to investors from any web browser (Mobile, PC, Laptop, Tab etc.).

You will get features in DSE-Mobile app based on access rights set by the TRECs (Broker).

2.2. Install DSE-Mobile App

Device Compatibility - Minimum requirements to use the DSE-Mobile:

- • **Android Device**: Minimum version of Android is 11 to get optimum features and all functionalities of DSE-Mobile. But user can install the App on Android 8.1 or later version subject to support by the Google Play.
- • **iOS Device**: Minimum version of iOS is 13 to get optimum features and all functionalities of DSE-Mobile. But user can install the App on iOS 12 subject to support by the Apple App Store.
- • Phone viewport size (screen resolution): over 350px
- • Internet data connectivity: 4G or Wi-Fi

Tips: *To get optimum performance of real-time market information, you should ensure good quality of internet connection or network connectivity.*

2.3. Access to DSE-Mobile:

Contact your TRECs (Broker) for registration and subscription for your desired DSE Mobility product.

- Once your login has been created by your TREC (Broker), you will receive your credentials (login/password) by email (VIP, Trader and Biz Owner features are hosted on the same app)
- Click on the download link of the email, or search for "DSE Mobile" in the Google Play Store or Apple App Store
- Select the app and click on "Install"

TIPS: *The app might prompt you to update it from time to time, although in most cases your phone will update it automatically. This is to ensure that you access all the latest features that are published.*

2.4. Logging in

- Click on the DSE-Mobile icon installed onto your device Home screen.
- The login screen prompts you to enter your Username and Password.

Login and password are provided by your TREC through email.

Please contact your TREC IT desk for blocked access.

Click on "Forgot Password" to reset your password.

Figure - the Login page

3. Overview

Once you logged in, the landing page is as follows:

Figure - the Home page

3.1. Quick Description

Figure - the NAVPAN

The **NAVPAN** or navigation panel placed at the bottom of the app allows navigation between all pages and access to filtering functions. It starts with the home button opening the Watchlists updated in real time.

Home

Access real time quotes on predefined lists and your customized favorites. Place instant orders using the **PODVIEW**.

Account

Access your Portfolio, Account details, Credit Limits, Customize preference in the App (Setting), or check the executions history.

Order Blotter

Access to your Order Blotter. The Order Blotter provides real time overview of orders placed, both originated from the mobile or desktop app.

Alert notifications

Go to this notification page to check your last trade executions.

Search and filter

Click on this icon to search for an instrument or apply filters on orders.

4. Home

This is the default landing page providing market overview. It allows real-time bid/ask market monitoring and fast order placement. You can configure/customize up to 3 **FAV** favorite lists of instruments.
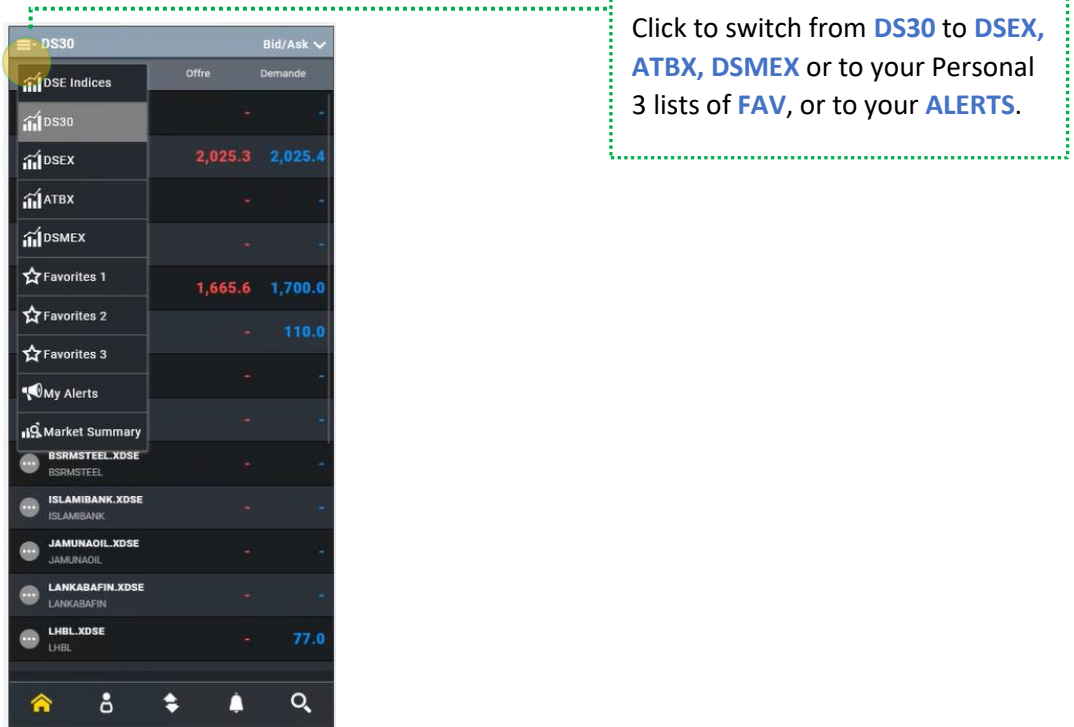

4.1. Consulting Watchlists

Fast access is key to any winning strategy. The **HOME** screen is a highly customizable quoting dashboard to suit your preferences. It brings you to the Default Watchlist – **Majors**. You can change it using the **RIBBON** menu. It will display the Real-time bid/ask quotes for the selected list of your choice.

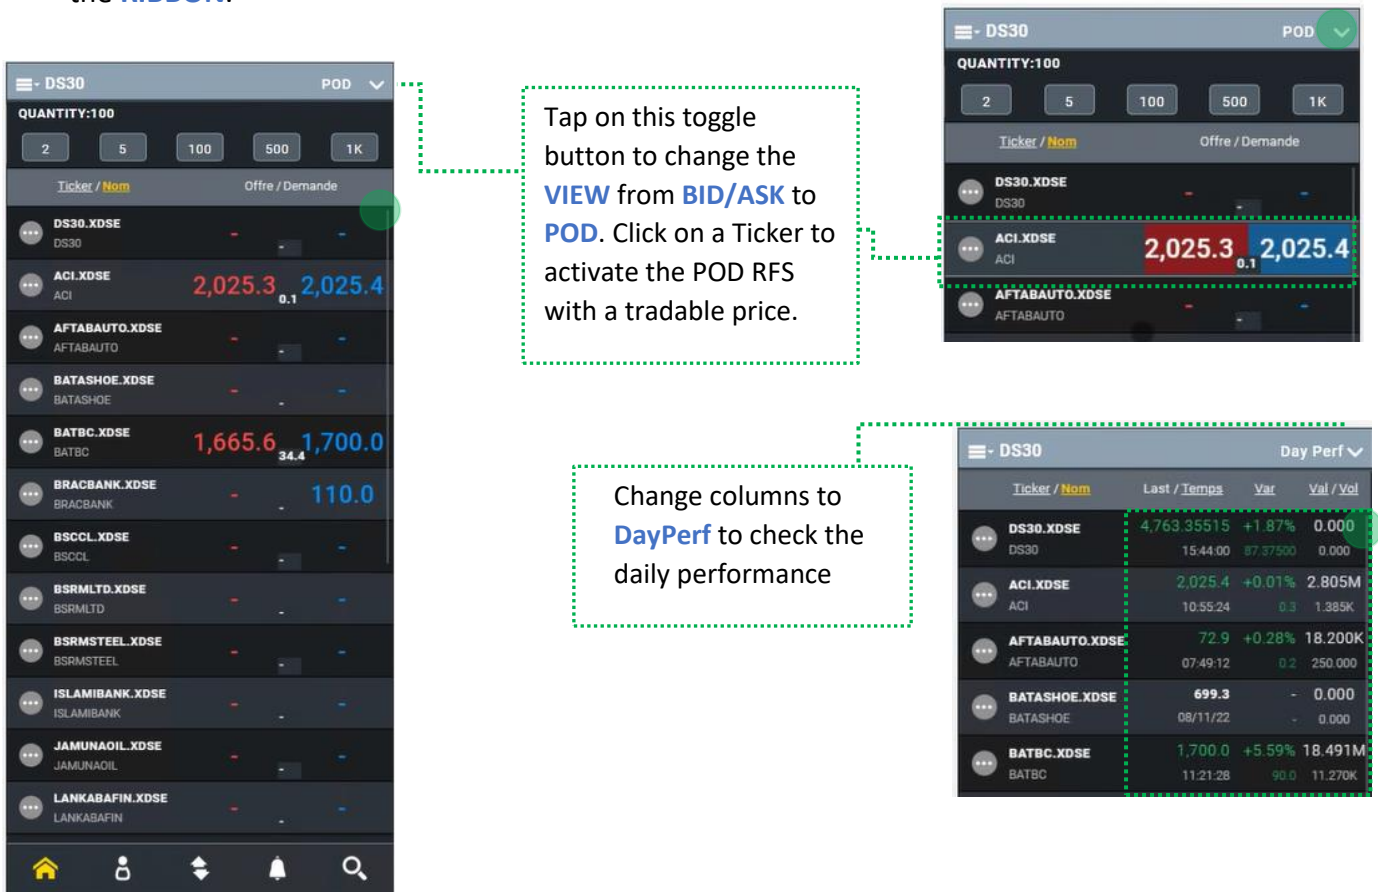

Figure - the RIBBON

Use this top **RIBBON** to select other watchlists and/or change views:

- Left side opens the **MENU** of available lists.
- Right side opens the different **VIEWS**.

Click to switch from **DS30** to **DSEX, ATBX, DSMEX** or to your Personal 3 lists of **FAV**, or to your **ALERTS**.

4.2. Switching views

You can also change the columns applied to your selected list, by clicking on the right side of the **RIBBON**.

Tap on this toggle button to change the **VIEW** from **BID/ASK** to **POD**. Click on a Ticker to activate the POD RFS with a tradable price.

Change columns to **DayPerf** to check the daily performance

4.3. Indicative vs RFS tradeable price

By default, MOGO is displaying indicative Bid & Ask quotes on all watchlists.

Figure - the PODVIEW

Switch to the **PODVIEW** from the right side of the **RIBBON,** then select the instrument you want to trade on to activate a **tradeable bid & ask price**, valid for 20 seconds. *Go the Trade section for more details.*

4.4. Searching for an Instrument

In the **HOME** page, use the quick search to find a currency pair not available the current displayed list
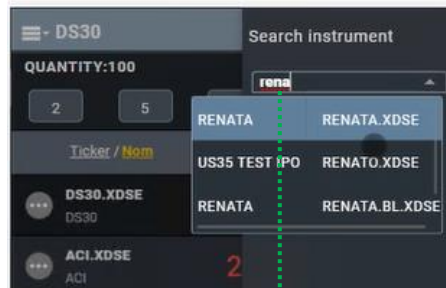

Figure - Search an instrument

Type few letters and results will be shown on corresponding tickers and/or name.

4.5. Manage your Favorite's Lists

With your DSE-Mobile app, you can manage 3 individual customizable watchlists of instruments. You have multiple ways to create/enrich a **FAV** list.

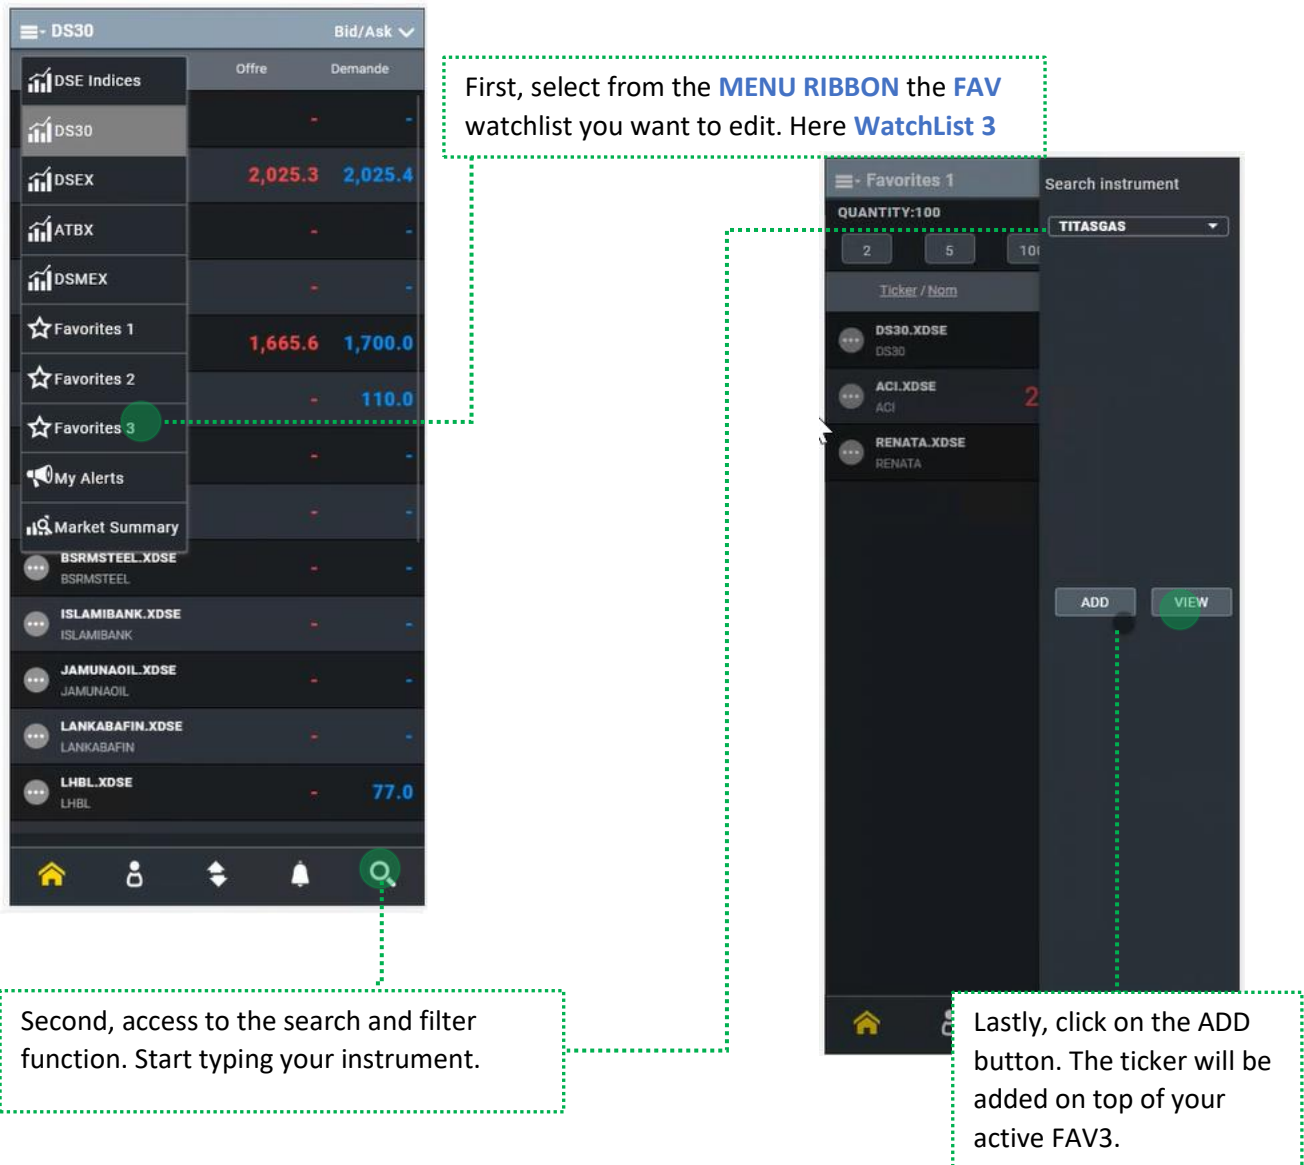

First, select from the **MENU RIBBON** the **FAV** watchlist you want to edit. Here **WatchList 3**

Second, access to the search and filter function. Start typing your instrument.

Lastly, click on the ADD button. The ticker will be added on top of your active FAV3.

Figure - Add a ticker to a favorite list

TIPS: *Your 3 personal watchlists are synchronized with the web desktop app accessible at the office. From that desktop you can also administrate your Favorite lists easily by transforming a composite list into a FAV.*

4.6. From Home to Instrument details

Click on a Ticker to go to its details.

The **INSTRUMENT DETAIL** displays market context, intraday chart, and pods

Click on the arrow to display full screen chart. Click again on the arrow to reduce it.
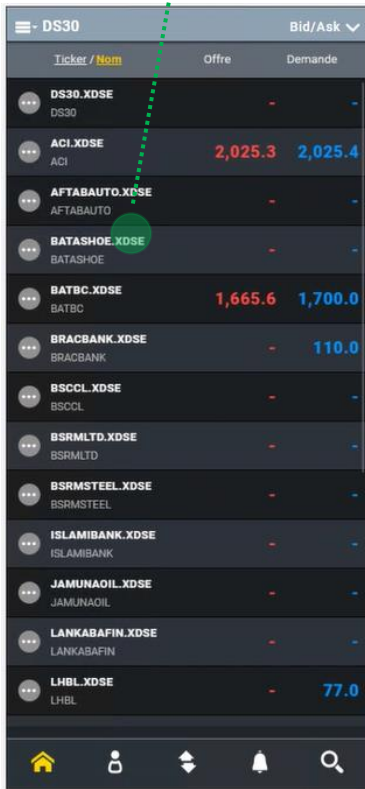

Figure - The instrument details

TIPS: *To go BACK, just tap on the HOME icon again.*

Tilt your device horizontally to display the chart in full screen.

On the full screen **CHART**, select from the list of type, periods and indicators to change the display.

Figure - full enlarged chart

*TIPS: No need to use your phone's back button. The **NAVPAN** is back mechanism.*

4.7. Contextual menu and Dual screen mode

Click on the 3 dots icon in front of any ticker to activate it contextual menu.
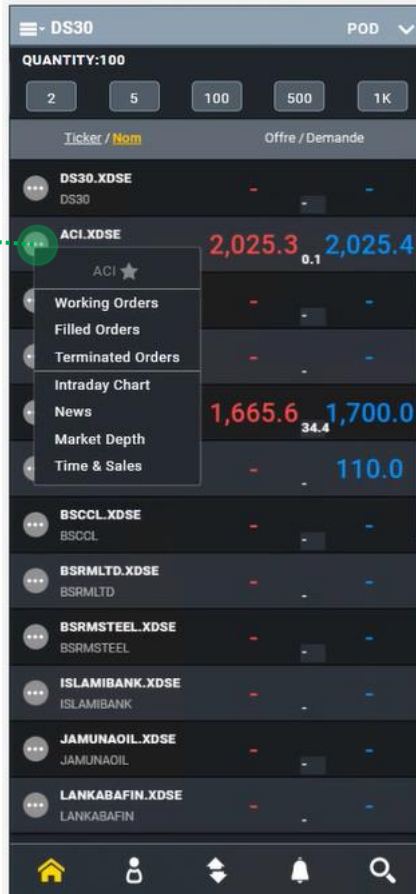

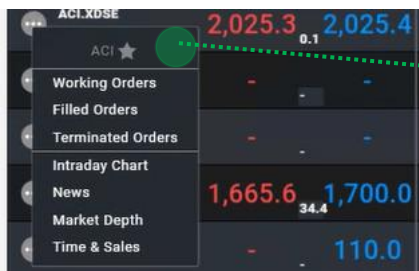

A contextual shortcut menu appears, giving access to the dual screen.

Select the entry of your choice: filled orders for example,

Or chart to get the corresponding intraday candles.
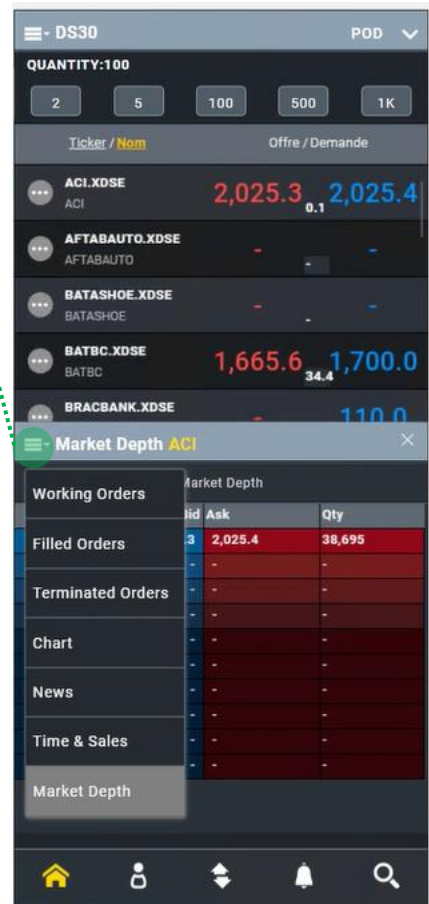

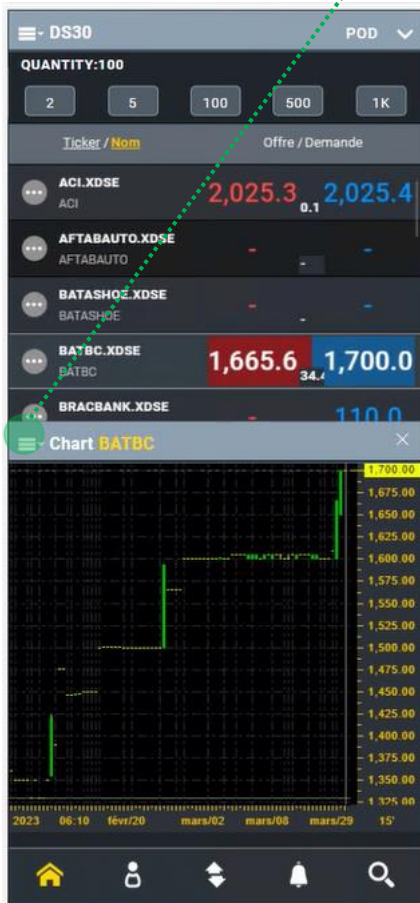

Figure - Contextual menu & dual screen

5. Trade ⇕

5.1. One-click Instant Trading

From the **Home** page or from the **instrument details**, you can tradeable price valid for 20 seconds. Once the POD is activated, you can trade in one-click.
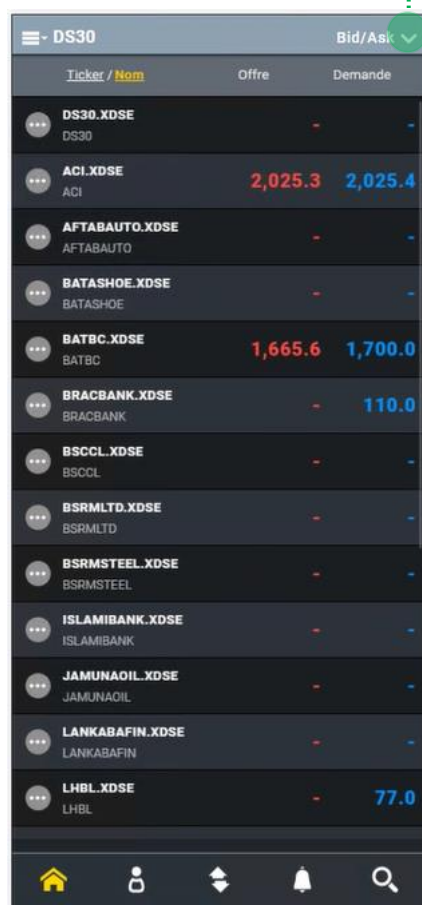

1-Switch to **PODVIEW**.

2-Select the instrument and Trade.

The watchlist can be displayed in either BID/ASK mode or **POD**.

Just tap on this icon to switch to **POD** mode.

Click on the indicative B&A of any instrument to activate a tradeable POD.
TIPS: taping on the ticker name will take you to Instrument details.

Trade by tapping on any side. The quantity is set by default with the quantity buttons.

Figure - Instant trade from POD View

5.2. Trading Popup Notifications

A market order is placed instantly, and a notification message appears during 3 sec.

Figure - Order placement notification
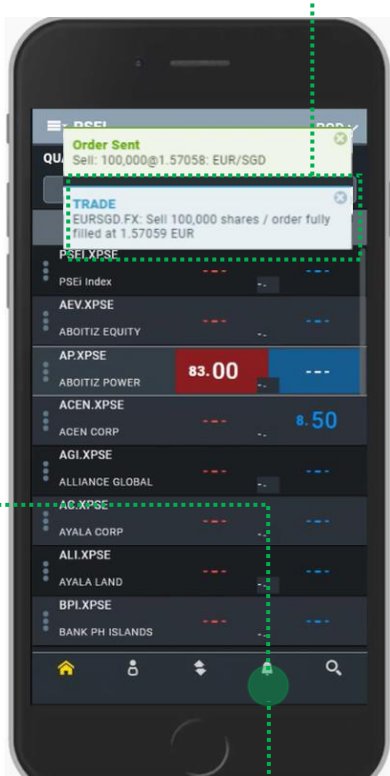

When the trade has been executed, you will be promptly notified so you won't need to check your Notifications page constantly.

You can view All Notifications in the notifications page by clicking here

A numbered icon will also count that there are notifications

TIPS: *The POD is active for 20 seconds. Then, the watchlist will switch back to indicative quotes. This is a security to prevent from accidental trades, since this one-click trade is instantaneous.*

5.3. Set your Default Trading Quantity

Shortcut buttons are available to set the **DEFAULT QUANTITY** (**DQTY**) that will be used by default to trade instantly from the watchlists of your **HOME** and in the **PODVIEW**.

Current default QUANTITY is set below at 100.

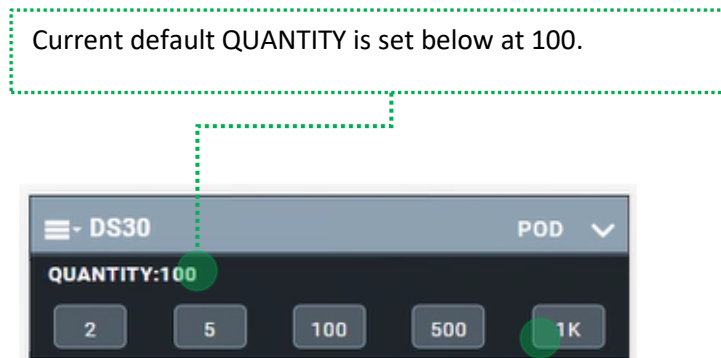

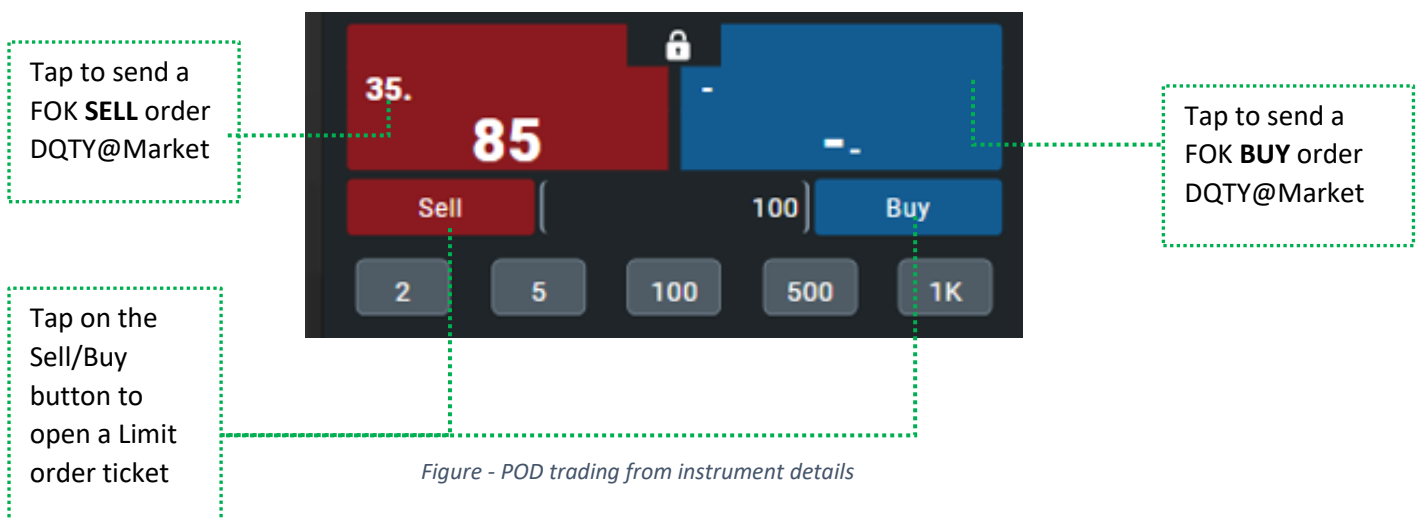

Figure - Default quantity & its button shortcuts

Buttons are cumulative use multiple clicks to set your preferred amount as follows:

- One click on 100, then one click on 500 will set 600
- 3 consecutive clicks on 500 will set 1,500
- All combinations are possible mixing buttons

One long press on any button will reset the default quantity to the amount of the selected button.

Once your **DQTY** is set, it will be prefilled in all trading tickets and PODs.

This **DQTY** and its button shortcuts are also accessible from the POD of the **Instrument details**.

Tap to send a FOK **SELL** order DQTY@Market

Tap to send a FOK **BUY** order DQTY@Market

Tap on the Sell/Buy button to open a Limit order ticket

Figure - POD trading from instrument details

5.4. Unlocking the POD to trade

From the **HOME** page, in the **B/A view**, tap on a ticker name will open **the instrument details.**
From this page you can activate an RFS tradeable price and place an instant FOK market order.

In HOME, from Bid/Ask View, tap on any NAME in your watchlist to go to the selected instrument details page.

Tap on the LOCK to activate an RFS. Once you see pip difference in place of the lock, **the POD is unlocked.**

You can trade.

Tap to send a **SELL or BUY once the POD is unlocked.**

Pip spread indicates an RFS quote is active.

You may click on Buy and Sell to trade during 20 sec.

If Lock is ON in place of pip spread the RFS quote has expired.

Lock is ON. This is an indicative quote, cannot trade. Click on Bid or Ask will not trigger a trade.

No Lock. This is an RFS, which stays active during 20 sec. Tap on any side will trigger an instant FOK order.

5.5. Place Resting orders

From the **HOME** page, in the **B/A view**, tap on a price to open a Limit order ticket.

1-Open a Limit ticket from the HOME Watchlist.

Select the B/A view

Tap on BID or ASK to open a Limit ticket.

Tap on a name to open the instrument details.
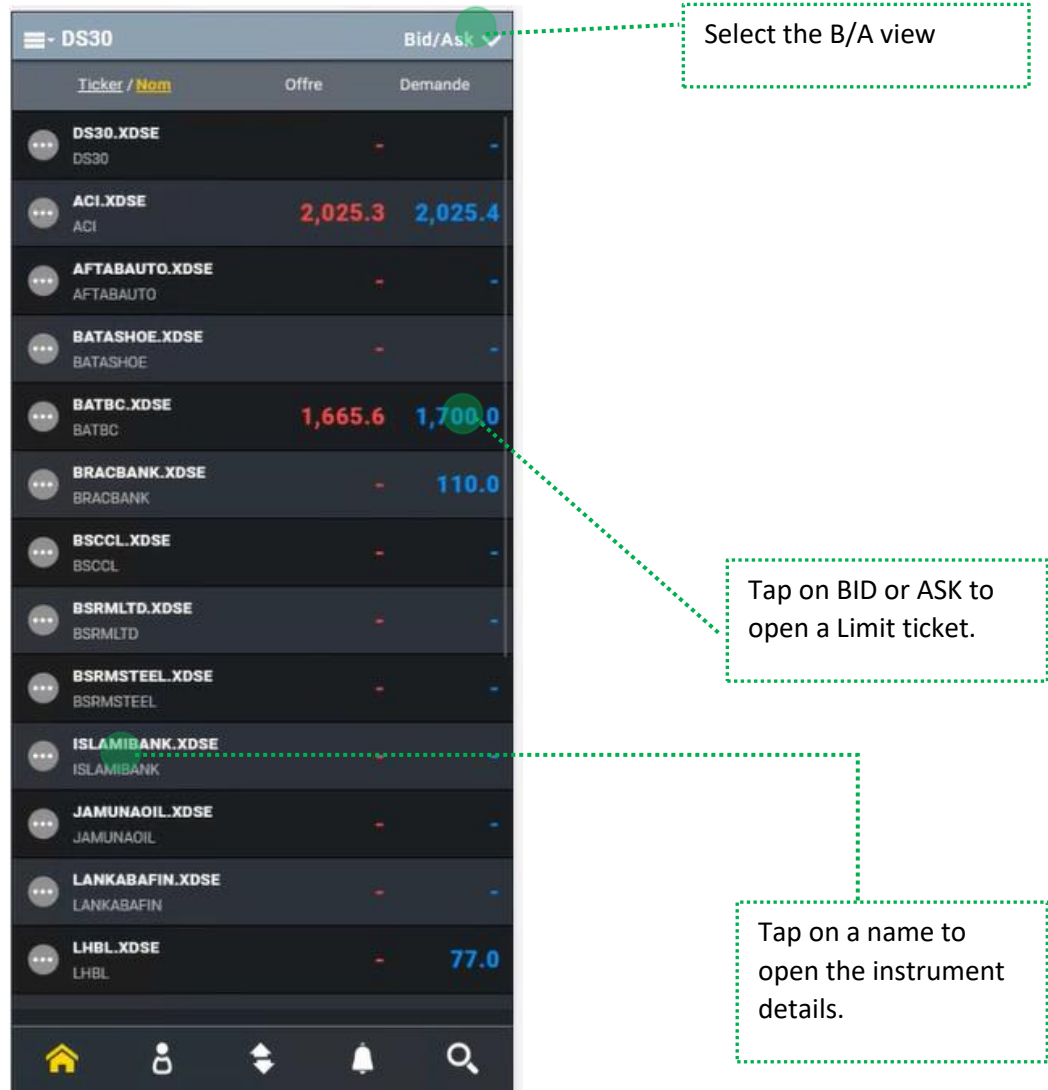

Figure - The BID & ASK view

2-Fill-out the details by just tapping on the buttons. No keyboard needed!

Tap the arrows to reverse the Order type (e.g., Buy to Sell)

Tap to change to the Order type `Limit`

PRICE: market price is prefilled by default

Set your QUANTITY

The **DQTY** is prefilled.

To change it, use the buttons. Tap 1 or x times to reach the number you want (e.g., tap 3x on 500K to get 1.5M).

Use the -/+ to adjust the price

Tap to review order before sending
